Vascular Anomalies :
Concepts and Controversies
Berlin – Eberswalde 2016

October 14th to 15th, 2016

WELCOME

Dear Colleagues,

The Center for Vascular Malformations Eberswalde (ZVM) and the Laserklinik at Elisabeth Hospital Berlin are pleased to invite you to an international multidisciplinary conference on the treatment of vascular malformations in children and adults. This two day meeting is sponsored by the German Network on Vascular Anomalies.

There is rising interest amongst the international medical community in the diagnosis and treatment of vascular anomalies. The ever growing numbers of scientific publications and presentations is a clear marker of such interest. Another trend is the understanding that these complex disease processes are best managed by a multidisciplinary team, ideally, in the setting of specialised centers dedicated to these patients.

Our conference will focus on the treatment of various vascular lesions. We will combine short keynote lectures with controversial discussions (two speakers present pro- and con positions with open audience debate), films and case reports; a format allowing vivid thought-provoking debate.

We welcome you to Berlin and hope that you will become a part of our program!

Lutz Meyer (Eberswalde), Milton Waner (New York), Jörg Seemann (Eberswalde), Dieter Hüseman (Eberswalde), Carsten M. Philipp (Berlin)

PRELIMINARY PROGRAM (DETAILS WILL FOLLOW)

Classification

Michel Wassef, Anatomie et Cytologie Pathologiques, Hôpital Lariboisière Paris, France

Hemangioma and Co. (NICH/RICH etc.)

Jochen Rößler, Pediatric Hematology/Oncology, University Clinic Freiburg, Germany

Lymphatic Malformations

Milton Waner, Vascular Birthmark Institute New York, USA

Portwine Stain

Carsten Philipp, Laser Center, Elisabeth Hospital Berlin, Germany

Klippel-Trénaunay and Co.

Robert J. Rosen, AVM Center, Director Interventional Radiology & Endovascular Surgery, Lennox Hill Hospital New York, USA

Venous Malformations

Juan Carlos Lopez Gutierrez, Chief of Pediatric Reconstructive Surgery and Director of the Vascular Anomalies Center, La Paz Children's Hospital Madrid, Spain

Arterio-Venous Malformations

Walter Wohlgemuth, Interventional Radiology, University Clinic of Regensburg, Germany

Sirolimus

Annabel Maruani-Raphael, Dermato-Vénérologie, Université François-Rabelais, Tours, France

Format of each topic:

Keynote lecture (15 minutes as short overview), one controversy (pro and con-Speakers 5 minutes each), discussion (30 minutes), treatment options - films presenting surgical or radiological interventions and case reports of problem cases (30 - 35 minutes)
